

**PROMECO**

# COMPANY PROFILE

PROMECO S.p.A. - ADVANCED WASTE TECHNOLOGY

# STRENGTHS

---

## KNOW - HOW

---

The broad experience on filed gained at international level has given Promeco strong expertise: from the activity of sole engineering (during 90s) to the construction of single machinery to be used in its plants and processes, Promeco could develop tailored plant solutions dedicated to specific requirements, and not only standardized machines like those available on the market.

---

## HIGH CUSTOMIZATION

---

Promeco solutions are able to fill the market gaps because they are ad-hoc engineered: Promeco plants are composed for 80% by machinery at 100% designed, constructed and assembled by the same Promeco, which is still the customer after-sale referent thanks to its well-supplied stock.

---

## BUSINESS CONTINUITY

---

The long history of Promeco is the guarantee of business continuity, its economic and financial viability gives unquestioned integrity and reliability, proving to customers that they are dealing with a serious Company providing long-lasting machines and plants.

---

## PRODUCT QUALITY

---

The Company policy focuses on product quality: robustness and functionality of the machines that maintain their value over time.

---

## INTERNATIONALITY

---

The ability to challenge ideas and concepts and to interact with partners worldwide has allowed and still allows Promeco to stay highly competitive and to be an ideal partner for the world market
